

Bamboo Handle Eco Friendly Brushes

Celtic Sustainables take pride in introducing the exciting, innovative and exclusive new **Eco-friendly Paint Brushes** featuring bamboo handles and extra long, thick, soft bristles.

The patent pending brushes feature a laminated bamboo handle with a beautiful natural grained finish.

The working end of the brush features a formulation of ecologically blended bristles and synthetic filaments that is designed to provide a lifetime of use and perform equally as well in oil or water based paints.

The brushes are available in sizes from 1" to 4", including a 2" Angle Sash model. They are also available in attractive multi-packs; an ideal gift for an aspiring decorator.

About Bamboo – The Environmental Benefits

Bamboo is a woody perennial. It grows astonishingly quickly, needing little fertiliser, water, or care. Due to its rapid growth bamboo can be harvested every five years with no disturbance to its roots – minimising soil erosion.

It produces 20 times more timber than a tree in its lifetime and gives out around 35% more oxygen – making it more sustainable than wood. Using sustainably farmed bamboo reduces the deforestation of rainforests.

The bamboo in our Eco Friendly Brushes comes from sustainable forests, and is not the type of bamboo that pandas eat. There is also a donation to Rain Forest Rescue, a charity devoted to saving large areas of rainforest from destruction, with every brush sold.

Along with its environmental benefits bamboo is hard, stronger than maple, lighter and more durable than oak; making it an ideal material for many applications - including our **Eco Friendly Brushes**.

The brushes are available from our [factory outlet](#), and the [Celtic Sustainable Online Shop](#).
