About this brand

GRAPHENSTONE®

Graphenstone are committed to developing natural, ecological and healthy coatings. They have developed a new line of natural paints and mortars using artisanal lime. A unique lime with a 100% natural and environmentally friendly production cycle. After generating new ecological, natural and sustainable coatings based in lime, they added graphene to the formula. The objective behind the [...]

LEARN MORE

Graphenstone® Mineral Paints, Renders and Primers are lime based interior and exterior coatings containing graphene reinforcement. Graphenstone products applied to interior and exterior walls allow them to breathe and absorb CO2 due to its mineral base (limestone), as well as acting as a thermal and acoustic regulator.

Graphenstone coatings are formulated with a high quality lime base. This purity and high pH prevents mould growth and bacteria reproduction on its surface. Graphene fibres act to improve flexibility and strength. Graphenstone paints have a guaranteed life of 10 years.

Graphenstone is the ultimate ecological range of products, composed of natural elements that purify the air we breathe inside our homes. It is suitable for people suffering from chemical intolerance and respiratory issues like asthma. Graphenstone is recommended for indoor enclosures, hospitals, nurseries, schools, or rooms for infants and children.

The health benefits resulting from the use of Graphenstone materials for individuals living in eco-sustainable homes include:

- improves air quality of indoor environments;

- limits pathogens;
- prevents mould growth, fungi and bacteria;
- guarantees safe domestic environments; and
- increases comfort and quality of life.
